

# Guidance for Exposures and Quarantine in the K-12 school and JACS setting

## Masking helps keep kids in the classroom.

Persons who test positive should not be in school until cleared by local health department. Persons who develop symptoms of COVID-19 need to test and isolate and not be at school or around others.

Information and standards are from the Missouri Department of Health & Senior Services and the Missouri Department of Elementary & Secondary Education.

\*Individuals exposed in this category not participating in a test to stay program will need to quarantine at home.

\*\* At-home tests will not be accepted for decisions on isolation and quarantine recommendations. Tests and results must be from a medical facility.
